#### Seniors

- There are 22,754 people over age 65 in Hamilton County. (Census ACS 5-year Estimates, 2007-2011)
- 13,520 households in Hamilton County are living with their own grandchildren under 18. (Census ACS 5-year Estimates, 2007-2011)
- Arcadia, Cicero, and Sheridan have the highest percentage of people over age 65. (Census ACS 5-year Estimates, 2007-2011)
- The percentage of people over 65 in Hamilton County has been growing since 2000, significant growth beginning in 2005. (Stats Indiana)
- In 2003, the growth rate for older adults surpassed the growth rate for school aged children in the county. (Stats Indiana)
- More than 20% of households in Arcadia, Cicero, and Sheridan have at least one person over age 65. (Census ACS 5-year Estimates, 2007-2011)
- The population over age 65 in Hamilton County is expected to grow through 2050, reaching more than 20% county-wide. (Stats Indiana)
- 15% of people over age 65 in Sheridan live in poverty. Other Hamilton County communities are below 10%. (Census ACS 5-year Estimates, 2007-2011)
- Nearly 40% of renters over age 65 are cost burdened, with more than 35% of their income spent on housing. (Census ACS 5-year Estimates, 2007-2011)
- Approximately 20% of homeowners over age 65 are cost burdened, with more than 35% of income spent on housing. (Census ACS 5-year Estimates, 2007-2011)
- HUD's FY 2013 Fair Market Rent for a 1-bedroom apartment in Hamilton County is \$615 per month, including utilities. (US Department of Housing and Urban Development)
- 494 people in Hamilton County over age 60 are living with their own grandchildren under age 18. (Census ACS 5-year Estimates, 2007-2011)
- 12.1% of the people over age 60 living with their own grandchildren under 18 in Fishers are Hispanic. (Census ACS 5-year Estimates, 2007-2011)
- Nearly 60% of the grandparents over age 60 who are responsible for their own grandchildren under 18 in Hamilton County are in the labor force. (Census ACS 5-year Estimates, 2007-2011)
- In Westfield, Fishers, Noblesville, and Sheridan more than half of grandparents responsible for grandchildren are in the labor force. (Census ACS 5-year Estimates, 2007-2011)

The Self-Sufficiency Standard measures how much income a family of a certain composition in a given place needs to adequately meet their basic needs—without public or private assistance. Several different criteria are required to make the Standard as consistent and accurate as possible, yet varied by geography and family composition. To the extent possible, the data used in the Self-Sufficiency Standard are:

- collected or calculated using standardized or equivalent methodology nationwide
- obtained from scholarly or credible sources such as the U.S. Census Bureau
- calculated to be enough to meet the given need at a minimally adequate level, usually by or for a government aid agency
- updated annually
- geographically- and/or age-specific, as appropriate

The Self-Sufficiency Standard is calculated for 70 different family types for all counties within a state. Family types range from one adult with no children, to one adult with one infant, one adult with one preschooler, and so forth, up to two-adult families with three teenagers. While these families represent the majority of households, the Standard can also be calculated for larger and multi-generational families.

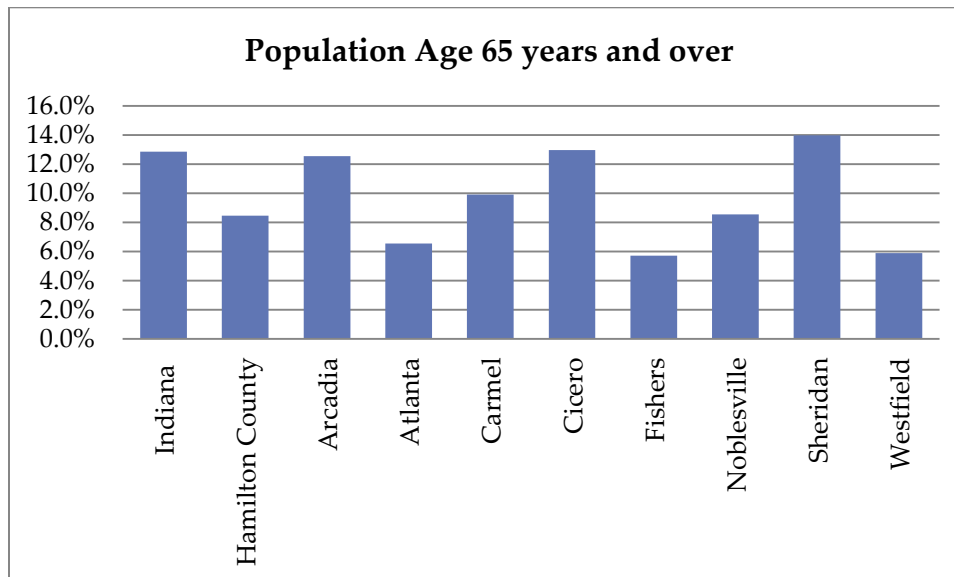

The Self-Sufficiency Standard assumes adult household members work full-time and therefore includes all major costs associated with employment for every adult household member (i.e., taxes, transportation, and child care for families with young children).

Children included in the calculations in this report are school age.

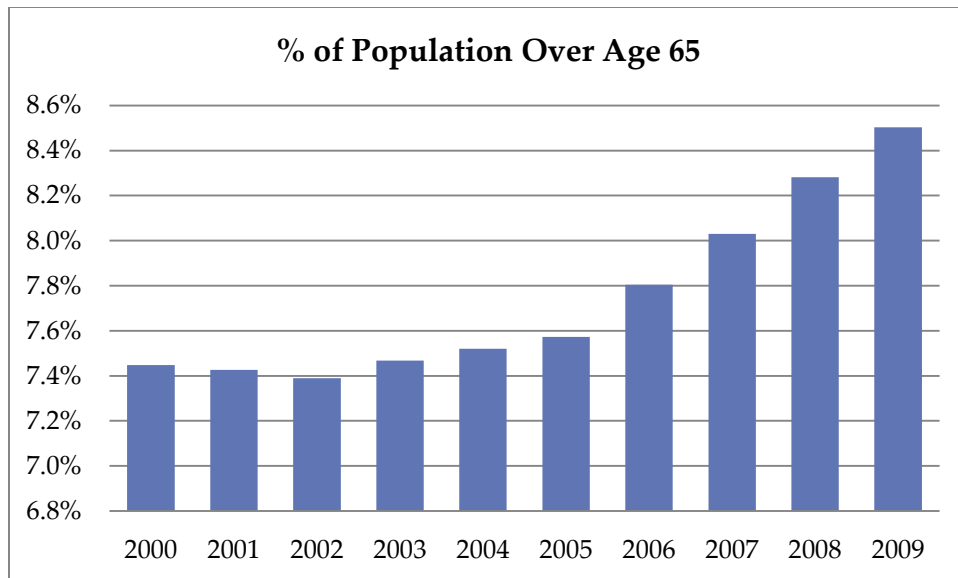

## Charts, Tables, and Maps

Self-Sufficiency Standard						
Hamilton County						
	1 adult	2 adults	1 adult 1 child	2 adults 1 child	2 adults; 2 children	2 adults; 3 children
